Re: Length of Pool Lanes Certification  
NCAA Swim Meet

Dear Mr. Roberts:

The purpose of this letter is to certify the length of competition lanes at the Georgia Tech Aquatic Center for an NCAA Swim Meet.

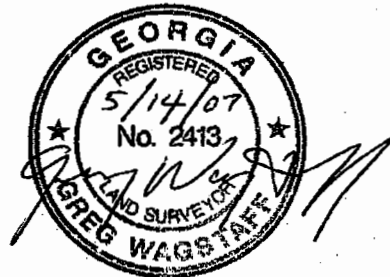

This morning, at my direction, a field survey crew measured the length of each lane using a Trimble S6 Robotic Total Station. Measurements were taken first, with touch pads on both ends, then, with touchpads at one end only. The following measurements resulted (measurements in meters):

Lane	Distance – Pads both sides	Distance – Pad one side
1	50.001	50.018
3	50.003	50.017
5	49.997	50.013
6	49.996	50.013
8	49.992	50.003
10	49.988	50.002

Sincerely,

Greg Wagstaff, R.L.S.  
Survey Coordinator  
Prime Engineering, Inc.
