Re: Pool Lane Certification

Dear Ms. Dorsey:

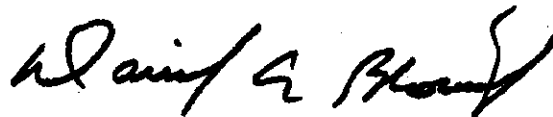

The purpose of this letter is to certify the length of competition lanes at the Georgia Tech Aquatic Center.

On the day of February 6, 2008, at my direction, a field survey crew measured the length of each lane using a Trimble S6 Robotic Total Station. There were touch pads at both ends of the lanes when the measurements were made.

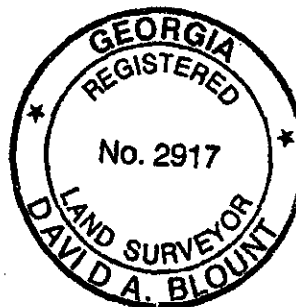

The following are the results of our measurements:

Lane	Distance - feet
0	75.002
1	75.001
2	75.002
3	75.014
4	75.012
5	75.001
6	75.006
7	75.002
8	75.016
9	75.001

Sincerely,

David A Blount, R.L.S.
Survey Coordinator
Prime Engineering, Inc.
